Food and Nutrition
November - December 2023

Date: 23/11/2023

Dear parents,

During the theme unit of this month "Food and Nutrition" the children will research, explore and observe to learn about: the importance of food for growth / food sources (animal - vegetarian)/ food groups/ food pyramid/ healthy balanced diet/Healthy and unhealthy food / Traditional food of countries around the world / Table manners
To achieve these objectives, we involve the children in hands-on activities. We work on developing the children's teamwork and discussion skills, and help them think scientifically through observation, description, concept categorization, comparison, and information analysis.
Additionally, we utilize technology as a means to enhance these skills and expand learning and exploration opportunities. We provide interactive educational resources that make the learning process more engaging and enjoyable.
