

## Topic: Let's talk about Obesity

**Objective:** Enhance students' ability to incorporate the skills they learn in school with real-life situations. This includes team-working skills, proper communication as well as develop their own personal characteristics such as their self-esteem and their ability to express themselves.

## Assessed Subjects

Subject	Subject specific objective
English	Speaking, writing and listening skills.
Global perspectives	Analysis, reflection, collaboration, communication and evaluation skills.
Math	Make a table which includes the mass, the length, and BMI, as a slide in the presentation.
ICT	Create and manage power point presentations, edit and format slides, add charts and tables, apply animations.
العلوم	تأثير السمنة على اجهزه الجسم المختلفه.

## Project description

Students are expected to prepare a PowerPoint presentation and a poster/ flyer raising awareness among the school community – children, youth, parents and school staff about the consequences of obesity and promote leading a healthy lifestyle

## Teams and work

Team work; 3-4 students per group (assigned by the teacher)

Each teacher will offer one class for discussion of the topic.

Students will finish working on the projects in school, as the final product is an oral presentation. Some of the work will not be done in school.

**Research about obesity, it is required that they present and discuss the information they have acquired on the topic.**

- I. Present their work using posters, slide shows, models or other visual aids.
- II. Present during a 10-minute time limit.

## Outcome

Subject	Deliverable / Outcome
English	An oral presentation of the product the students choose. Students are required to present the information according to the English rubric.
Global perspectives	An oral presentation of the product the students choose. Students are required to present the information according to the GP rubric.  The product should include:  1. Introduction of obesity and overweight and issues related to obesity both nationally and locally in Jordan 2. Highlight causes and consequences 3. Course of actions (suggest solutions with some reasoning) 4. Conclude (wrap-up) 5. Citation and resources (referencing resources)
علوم	قيام لطالب باضافه خمسه شرائح باللغه العربيه ليوضح اثر السمنه على اجهزه الجسم. (صور, جداول)
ICT	PowerPoint presentation, well edited and formatted with charts , tables and animations.
Math	Find BMI (Body mass index= $\text{kg} / \text{m}^2$ )

The National  
Orthodox School  
Shmaisani

Stage (6-8)

School Year 2022 – 2023

Interdisciplinary Project - 3<sup>rd</sup> Month Assessment\_- Term 2

Grade 8 CS

## Audience

Class peers

## Submission deadline

May, 20<sup>th</sup> 2023

## Submission format / Details

Each team leader to fill the attached submission document and upload it on LMS for every subject.

## Resources

Students can refer to the Learning Centre at school, or refer to safe and acknowledged search engines, introduced and discussed in class.

Students have to refer to 3 different resources at least.

Students have to mention the resources they referred to.

## Assessment Criteria

Students' work will be assessed based on the following rubrics.
