Homework: Food webs

Grade-Section: 6 CS – All Sections

Objective: Identify the parts of a food chain and food web.

Question One:

Answer the following questions about the food web below.

- The big fish is a predator to the little fish.
- Which animals would have a bigger food supply if the number of little fish decreased? plankton & sea turtles
- Which organism would have the least biomass in this food web? shark.
- Sharks are both predators and prey.
 - True
 - False
- Decomposers are very important for life on Earth.

Explain what is the role of decomposers in food webs.

A decomposers role is to break down dead animals into nutrients for the soil
