

But what about the ovens, machines, land and buildings? They are also important resources for every business. They are called capital resources.

### Activity 2.8

#### Directions:

List all of the resources you need for your business and classify them as natural, human, or capital resources.

company

(2000) car company  
it will use capital resources because a car company requires robotics and tech and I will use natural resources for the car seats and then body. and I will hire staff and workers. first I will start of small try to buy cheap car parts and try to build and sell cars

? labour  
finance ?  
Enterprise
