

**Student Name: Samir Malky**

**Class: 7G**

**Reflective Paper – Global Perspectives**

**Subject: Design your own Menu**

We enjoyed working on this project, we started by analyzing the requirements of the project then we divided and distributed the tasks to both of us.

After that, we met and combined each one's results, every one of us checked his partner's work to make sure the spelling, the organization of everything is correct.

We designed the colorful menu and prepared it for submission.

The project was supposed to be a classroom project, but as we had exams and didn't have extra time at school, we had to finish it at home, big Thanks for our parents for helping us to meet each other after school to be able to complete it on time.

The main reason that we enjoyed this project is that we were both sharing almost the same vision and equally worked giving the same efforts. We both worked hard as always, as we love to finish our tasks perfectly on time.

It was fun imagining having a restaurant together and designing our favorite dishes in a special menu for FIFA World Cup!
