INTRODUCTION

Online education is a fast and easy access mode for education in which mode of education is internet and it can take place away from the physical campus

It is beneficiary in terms of saving time for distant places.

TYPES OF ONLINE LEARNING

Synchronous:

Teachers and students have some direct contact.

Asynchronous:

Instructor and learner do not meet in time or space.

ADVANTAGES AND DISADVANTAGES

Advantages

. Variation in course

.lower cost

.comfortable learning environmental

.continue in profession

Disadvantages

.difficulties with technology

.difficulties with interface

.high rate of eagerness to participate

.technology issues

FUTURE

.65% post secondary institute providing
 collage level learning online courses.
. Large number of schools from western
 countries participating .
.IIMB has tied up with edX platform.

DIFFERENCE:

ONLINE LEARNING

- USE OF INTERNET
- COMFORT LEVEL
- FLEXIBILITY
- AUDIO AND VIDEO
- SAVES TIME, EFFORT AND MONEY

CLASSROOM LEARNING

- TRADITIONAL METHOD
- REQUIRES LOTS OF EFFORT
- STRICT RULES AND GUIDELINES
- NEED TO BE PHYSICALLY PRESENT
- REQUIRES MORE TIME AND MONEY

BUSINESS PROBABILITY

. Big companies are investigating.

.Google capital invest $40 million in online

Online education.

.Online education giant khan academy's

Revenue as per 2012 data 15.796 million USD.

CONCLUSION

.ICT and e-learning offers opportunity
To schools.
.helping to break the educational barrier.
.need a lot of improvements.
.Need to create an awareness for online
Educational.
