School Year 2022- 2023**

Name: _____

Subject: English Language

Writing a Compare and Contrast Report

Date: / /

Class: Grade 4 National

(All sections)

Objective: To write a compare and contrast report.

Our Solar System	N-30 Solar System
Has eight planets.	Has eight planets.
Planets don't have green surfaces.	Each Planet has a green surface.
Has an asteroid belt	Has an asteroid belt
Some planets have moons and some don't.	Some planets have moons and some don't.
All planets have animals and plants on them.	Only Earth has animals and planets.

Write two paragraphs comparing and contrasting between “N-30” and our solar system.

- In the first paragraph, say why the two solar systems are the same.
- In the second paragraph, say why the two planets are different.

The N-30 Solar System

In my imagination, I took a trip in my spacecraft to the N-30 Solar System in the New Galaxy. I found out that the

N-30 and our solar system are similar in some ways but different in other ways.

N-30 is similar to our solar system in three ways. First, N-30 solar system has 8 planets that travel around a star like our sun. Next, N-30 has a belt of asteroids like ours. Finally, like our solar system, some of the planets have moons and some don't.

However, the N-30 solar system is different than our solar system in three ways. First, each planet has a green surface. Next, all planets in the N-30 solar system have plants and animals on them. Finally, N-30 solar system planets have the same size.

The N-30 solar system is an interesting place. I will visit it alone very soon. If I have a spaceship one day, I will explore a real solar system.
