

## Writing #2: Semi- guided/ flowchart style

- Watch the following video then write your text below.

Plant Life Cycle

Text title

### Plant Life Cycle

Introduction:

Have you ever wondered how a plant grows?

All living things have a life cycle, this flow chart explains the Life cycle of a plant.

First, the seed gets planted in the soil. It needs sun and water to grow well.

Second, germination happens when the seed grows a sprout and roots.

Finally, the plant needs sunlight, water, good weather to grow into an adult plant.

Then , the plant grows leaves to become a seedling.
