Question Two:

Read the following texts carefully, and then in your ANSWER BOOKLET answer all the questions that follow each text. Your answers should be based on the two texts.

(50 points)

Text One: (25 points)

Ibn Bassal was a writer, a scientist and an engineer who lived in Al-Andalus in the eleventh century CE. He worked in the court of Al-Ma'mun. His great passion was botany. Ibn Bassal was a practical man and all of his writing came from his own 'hands-on' experience of working the land. One of the many things which Ibn Bassal achieved was *A Book of Agriculture*. The book consisted of sixteen chapters which explain how best to grow trees, fruit and vegetables, as well as herbs and sweet-smelling flowers; perhaps the most famous chapter of all was the one that described how to treat different types of soil. He designed water pumps and new systems for irrigating plants.

The influence of Ibn Bassal's book was enormous. As farmers down the generations followed his instructions and advice, the land became wonderfully fertile and produced more than enough food for the fast-growing population. The irrigation systems that he and his followers put in place are still in evidence in Spain. Although his name is not widely known, Ibn Bassal's legacy to the world has been great.

Text Two: (25 points)

In this report, we will look at the countries that Jordan trades with and what goods it exports and imports. First, let's look at exports. Jordan is rich in potash and phosphate, and the extraction industry for these minerals is one of the largest in the world.

Not surprisingly, two of Jordan's largest exports are chemicals and fertilisers. Pharmaceuticals and other industries represent 30% of Jordan's Gross Domestic Product (GDP), and 75% of Jordan's pharmaceuticals are exported. However, the majority (65%) of the economy is dominated by services, mostly travel and tourism. Most of Jordan's exports go to Iraq, the USA, India and Saudi Arabia.

Now let's look at imports. Unlike some other countries in the Middle East, Jordan does not have large oil or gas reserves. For that reason, Jordan has to import oil and gas for its energy needs. Its other main imports are cars, medicines and wheat. In 2013 CE, 23.6% of Jordan's imports were from Saudi Arabia. This was followed by the EU, with 17.6% of its imports. Other imports have come from China and the United States.

1. Most of Jordan's exports mainly go to four countries. Write two of these countries down. **(4 points)**
2. What is the percentage that services, especially travel and tourism, represent of Jordan's economy? **(4 points)**
3. Jordan is rich in two minerals. Write them down. **(4 points)**
4. What does the underlined pronoun "it" refer to? **(4 points)**
5. Quote the sentence which indicates the country that supplied Jordan with most of its imports in 2013. **(5 points)**
6. What are the main four goods that Jordan has to import from different countries? **(4 points)**

Question Three:

In your ANSWER BOOKLET, write a composition of about 80 words on ONE of the following:

1. A visit you have made to a museum or an art exhibition gallery. When and where was it and what did you enjoy the most? What are the benefits of such visits to people and to countries?
2. An informal letter to a friend describing your dream job. Describe what your dream job requires you to do and what you aren't allowed to do at work. Give reasons that make you choose this kind of job.

Question Two: (50 points)

Read the following two texts carefully, and then in your ANSWER BOOKLET answer all the questions that follow each text. Your answers should be based on the texts.

Text One: (25 points)

In many countries, an increasing number of young people and adults are overweight or even obese. One reason for this is the growing popularity of fast food, which didn't use to be as common as it is now. Another big factor is lack of exercise. Modern technology has also played its part; we spend more and more time focusing on computer screens. Before the Internet was invented, nobody had dreamt of online shopping, but now we can buy almost anything without leaving the sofa.

Health experts have been warning about this trend for years, and their advice is clear. Adults should aim to exercise for at least two and a half hours every week; for children and teenagers the target should be at least an hour a day. This might not sound very much. However, recent research shows that less than 50% of the British population manages this. They recommend a mixture of activities. These should include moderate exercise, such as fast walking, and more strenuous exercise, like running. They also advise exercise that strengthens the muscles, for example sit-ups. The more muscle we build, the more calories we burn, and the fitter we become. In addition, exercise is a great way to cope with stress.

1. The text states different reasons for higher rates of obesity. Write down three of these reasons. **(6 points)**
2. Mixture of activities is recommended by health experts to keep fit. Write down two examples of these activities. **(6 points)**
3. Write down the sentence which states that British people don't get enough exercise. **(4 points)**
4. What is the minimum amount of exercise recommended for adults? **(3 points)**
5. Increasing awareness of obesity among children is the responsibility of the parents. Think of this statement and, in two sentences, write down your point of view. **(6 points)**

Text Two: (25 points)

In England, almost 50% of school leavers go on to higher education. The figure has not always been as high as this. Before 1998 CE, higher education in the UK was completely free for UK citizens. Since then, tuition fees have been introduced. Most students borrow this money from the government. They don't have to repay it immediately. Instead, they pay it back slowly out of future savings.

Despite the high cost, most students choose to study away from home. For most young people, living away from home means borrowing even more money from the government. So why don't students choose to avoid debt by staying at home, where they don't have to pay rent? Most of them say that they want to move to the university of their choice, rather than the nearest one. Another strong motive is the desire to live in a new culture. Where do these students live? Many have rooms in halls of residence, especially in their first year; others rent flats or houses. A lucky minority live in property that their parents have bought for them. Most of them need to learn to cook, do their own washing and manage their time and money.

1. The text states three different places that students may live in when studying away from their homes. Write them down. (6 points)
2. Students who study away from their home should do some of the daily skills. Write down two of these skills. (6 points)
3. What does the underlined word (it) refer to? (4 points)
4. Find a word in the text which means "**teaching, especially in small groups**". (3 points)
5. Students who choose to study abroad face different cultural challenges. Suggest three possible ways they can do to cope up with these challenges. (6 points)

Question Two : (20 points)

Read the following text carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the text.

Ten-year-old Adeeb al-Balooshi, from Dubai, is going to travel to seven countries on a tour which has been organised and funded by Sheikh Hamdan bin Mohammad, Crown Prince of Dubai. The boy caught Sheikh Hamdan's attention with his invention – a prosthetic limb for his father. The Sheikh has taken a special interest in the boy, and hopes the tour that he is sponsoring for Adeeb will give the young inventor more self-confidence and inspire other young Emirati inventors.

Adeeb got the idea for a special kind of prosthetic leg while he was at the beach with his family. His father, who wears an artificial leg, could not swim in the sea as he could not risk getting his leg wet. This inspired Adeeb to invent a waterproof prosthetic leg.

Adeeb is going to visit the USA, France, the UK, Ireland, Belgium, Italy and Germany, where he will be staying with relatives. However, while he is in Germany, Adeeb will not be spending all his time sightseeing. He will be working with a specialist doctor to build the appendage. He will also be attending a course on prosthetics and learning about different kinds of medical apparatus.

Adeeb has invented several other devices, including a tiny cleaning robot and a heart monitor, which is attached to a car seat belt. In the case of an emergency, rescue services and the driver's family will be automatically connected with the driver through this special checking device. He has also invented a fireproof helmet. This special equipment, which has a built-in camera system, will help rescue workers in emergencies.

Question Two : (20 points)

Read the following blog carefully, and then in your ANSWER BOOKLET answer all the questions that follow. Your answers should be based on the blog.

My name is Anita. Two summers ago, I spent five months studying Arabic at the German-Jordanian University near Madaba. As my father is originally from Jordan, I grew up speaking Arabic as well as German. However, I had never studied Arabic formally, and when the opportunity came up for me to spend a year in Jordan studying Arabic, I didn't hesitate for one moment.

I have relatives in Jordan and they arranged for me to stay with a wonderful family who live just outside Madaba. I was amazed by the number of international students there, who were not only from Germany, but from all over the world. Most of them had studied Arabic to a high level. I'm very familiar with colloquial Arabic, which is what my family speaks and understands. The Arabic class, in Modern Standard Arabic, was challenging, especially the grammar. Every week, we had to learn a vocabulary list of around 50 words. We covered many topics. Living with a family helped to improve my Arabic-speaking skills because I could practice it at home. I really put my back into it, and I earned an A on the course.

What impressed me most about students in Jordan was their behaviour and their attitude to studying. All the students who I met appreciated the importance of their university education and the opportunities it would give them to contribute to their country's prosperity.
