Let's Try It

Page	Answers
130	(1) (a) width, 3 m, 12 (b) length, width, 4 cm, 6 cm, 24 (c) length, length, 8 m, 8 m, 64

Workbook

112

(2) (a)

This shape has sides with equal length.

We can find the perimeter of this shape by:

$$\begin{aligned} \text{Perimeter} &= \text{5} \times \text{8} \text{ cm} \\ &= \text{40} \text{ cm} \end{aligned}$$

(b)

This shape has sides of equal length.

We can find the perimeter of this shape by:

$$\begin{aligned} \text{Perimeter} &= \text{8} \times \text{3} \text{ m} \\ &= \text{24} \text{ m} \end{aligned}$$

(3)

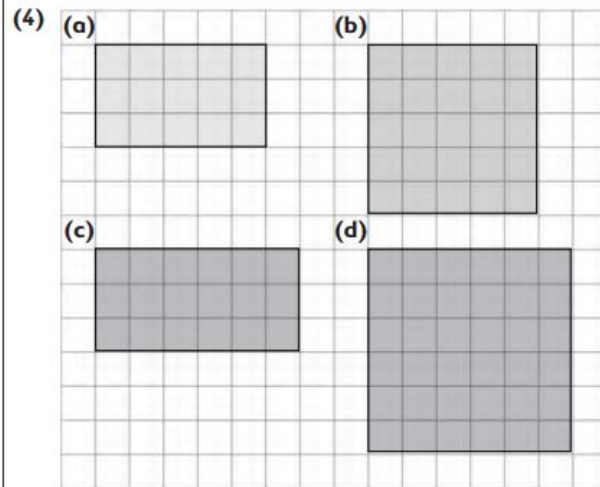

This shape has 6 sides of equal length.
The length of each side
 $= 54 \text{ cm} \div 6$
 $= 9 \text{ cm}$

115

(3) (a) area = 7×7
 = 49 cm^2

(b) area = 5×7
 = 35 m^2

(c) area = 12×8
 = 96 cm^2

118

(6) (a) $36 \div 9 = 4$ width = 4 cm

(b) $33 \div 3 = 11$ length = 11 m

(c) $2400 \div 100 = 24$ width = 24 m
